

# REGENTS WOULD CONTROL SCHOOL BUILDING USE

Dr. Gilbert, Deputy State Commissioner of Education, Would Thus Prevent Misuse of Property

## KELLY NOT CHARGED

Board Takes No Action Against Binghamton Man Whose Permission to Use Auditorium Causes Trouble

Albany, June 8.—In the opinion of Dr. Frank H. Gilbert, deputy state commissioner of education and counsel for the University of the State of New York, the time is ripe for the Regents of the University to prescribe rules to govern the use of public buildings throughout the state with a view to preventing their misuse by propagandists or groups of known un-American or disloyal tendencies, pretexts and practices.

Action should be taken, Dr. Gilbert said today, as to the use of school buildings where controversial questions of a political or social nature are to be discussed.

This matter may be considered by the board of Regents at a meeting to be held in this city probably next week. The date has not been fixed.

The next regular meeting of the board would come a week later, but it is understood that that date is not agreeable to some members of the board.

Under existing law, local boards of education throughout the state have jurisdiction over school properties, which may be used for purposes of instruction, library purposes and for social, civic, recreational and other uses of community welfare nature.

Used by Ku Klux Klan.

Ever since local boards of their rights in this regard has been in some instances led to their being imposed upon by unscrupulous persons. The latest case brought to the attention of the education department transpired in Binghamton over a month ago, when the high school auditorium was used for a Ku Klux Klan meeting, when the persons who applied for the permission that the meeting was to be a social community affair.

The board of Regents has the power, under existing law, to adopt rules and regulations concerning the state educational system and policies and for carrying into effect the laws and policies of the state relative to education. In Dr. Gilbert's opinion the board could adopt a rule supplementing the existing statute to cover the matter of the use of school properties.

## NO CHARGE PREFERRED

Contrary to opinion in some quarters, there have not been any charges preferred against Kelly, Dr. Gilbert said today. Kelly, president of the board of education of Binghamton, was not charged with any violation of the law, but the board of education of that city, for the reason that it is the duty of the board of education to see that the law is obeyed, it is expected that the board of Regents will not take any action against Kelly.

At the department Supt. Kelly said that one of the best school buildings in the state and it is expected that the board of Regents will not take any action against Kelly.

# About to Throw Woman's Body in Water; Arrested

New York, June 8.—Standing on a dark and lonely Staten Island pier, Miss Delozza, a Filipino, was seized by a police sergeant tonight as he was about to throw her body into the water.

Manhattan police were called to the 57th street address given by Delozza, who had been arrested there.

The young woman was lawfully dressed in a white lace gown.

The prisoner, police said, told them he was a porter and that both he and the girl had been employed in a doctor's office in Manhattan. Police said he admitted he had intended to dump the body overboard on the trip from Manhattan, but was prevented from doing so by the large number of passengers.

# SMALL BOYS THROW STONES AT CARS

Police Guard Brick Pile on State Street in Schenectady to Prevent Disorder There

Schenectady, June 8.—The police were increased four fold on the lines of the Schenectady Railway company today and cars were operated without interference beyond the activities of gangs of small boys in throwing stones. Several of the culprits tonight were under arrest. No other disorders were reported.

Police throughout the day guarded car lines and brick piles, mounting a special watch in State street where a new bank building is under erection and thousands of bricks are piled along the sidewalk.

Virtually no passengers rode on local lines and few took interurban cars, despite heavy rains. The usual "company deputies" guards for the crews, accompanied all cars.

The parade and demonstration planned for tomorrow afternoon by the striking carmen has been postponed, because the strikers said they did not wish to give occasion for further disorders or to be the cause of any rioting.

The chamber of commerce today made public resolutions urging citizens to do all in their power to preserve peace and order during the strike.

Hearing on the injunction granted the railway company by Supreme Court Justice Edward M. Ansell restraining the city of cars has been set for Monday morning at 10 o'clock. In event the city fails to have the injunction vacated, it will become permanent for the duration of the strike.

## DUTY TO UPHOLD DRY LAW, DECLARES JUSTICE SEEGER

Newburgh, June 8.—Supreme Court Justice Seeger today refused to dismiss the warrant charging John Carbone, of this city, with violation of the Miller-Tamm prohibition enforcement law, pending to its repeal, but granted a stay, pending an appeal from the appellate division.

Counsel for Carbone moved for dismissal of the warrant and District Attorney Wilson asked for time to submit briefs in opposition.

"That will not be necessary," said Justice Seeger. "The prohibition law has not been repealed, although the New York enforcement act has. Prohibition is provided for in the constitution and it is the duty of the court to uphold it so far as possible."

## "DADDY, I WANT A DRINK," CRY SAVES SIX PERSONS

Rochester, June 8.—A boy's cry for water this morning saved the lives of six persons when they were about to be crushed by a falling iron safe.

The safe, which was being lowered into a well, was about to fall when a boy, who was standing on the edge of the well, cried out, "Daddy, I want a drink!"

The cry caused the safe to be stopped and the six persons were saved.

# GERMANY ADDS RAIL LINES TO OFFER ON REPARATIONS

Experts Place Value of State Owned System at 30 Billion Gold Marks; Tariff Increase Expected

(By the Associated Press)

Berlin, June 8.—In throwing her railroads into the balance as a reparation guarantee, Germany is offering the largest state-owned railway net in the world, and one which ranks only fourth in mileage, being surpassed by the United States, Canadian National and the British Indian systems. It is even said to be the greatest single economic establishment so far as operations are concerned.

The tracks of the German railroad cover 55,545 kilometers and it includes the European system in size, despite a loss of 2,400 kilometers through the war. The federal government acquired the railroads in April, 1920, by paying the railways a total of approximately 10 billion paper marks. Financial circles credit the government with having put across a good business deal in making this purchase, although in recent years the system has been running with such a heavy deficit that the losses can scarcely be computed in paper currency.

Valued at 30 Billion Marks.

A liberal estimate by experts places the present value of the German railroads at 30 billion gold marks.

On the basis of this valuation the raising of two billion gold marks annually on the railroads, as proposed in the German memorandum, would mean an interest rate of only two per cent.

Business and traffic experts believe that much can be done to put the railroads on a paying basis. The main reason for the colossal deficit in the opinion of the experts, appears to be the fact that the tariff rates for the railroads are too low.

If the tariff rates were raised to a level which would allow the railroads to pay their operating expenses, it is expected that large tariff increases will be instituted immediately in order to promote a return to pre-war railway prosperity.

## WILL MAKE STATE FUNDS AVAILABLE TO FARMERS

New York, June 8.—A new method of allocating state funds for deposit in the state treasury today, whereby George Kent Schuler today, whereby a fund of virtually \$100,000,000 will be distributed to smaller banks of the state, available for loan to farmers during the period before crops come in from the crops.

Heretofore, according to Treasurer Schuler, state funds have been deposited with no special plan in mind, much of the money being placed in large New York banks. Under the new system, farmers will be able to obtain a smaller credit from their own banks in time of need.

# GOVERNORS' MEET SUFFERS DELAY

President Harding's Contemplated Conference on Prohibition May Be Held in Fall

Washington, June 8.—The conference of state governors which the president intended to call for a discussion of prohibition enforcement may be postponed until next fall. At the White House today it was said that the conference was "somewhat up in the air" and that a definite announcement would be forthcoming next week.

Although President Harding had hoped to have the governors meet here before he leaves on his trip to Alaska, the present sessions of some state legislatures, officials said today, might force a postponement of the conference at least until after the president returns to Washington. Another factor is the brief time remaining before the president's departure for the west.

With adequate notice to the governors regarding a subject, it was doubted whether a substantial number could be assembled here prior to the president's trip west.

President Harding told aides today that there was no immediate conference with officials in sight on the New York prohibition situation. It was understood that present conditions would be allowed to continue for the time being until more definite plans can be worked out.

## 35 RAILROADS INVOLVED IN EMPLOYEES' WAGE DISPUTES

Chicago, June 8.—Thirty-five railroads are involved in wage disputes with the United Brotherhood of Maintenance of Way and Railroad Shop Employees.

The wage disputes have been consolidated into one docket for hearing before the United States Railway Labor board June 11, it was announced today.

Five roads involved in wage disputes with the Brotherhood of Railway Station Employees also were included in a docket that will be heard on the same date.

Within recent weeks, the maintenance of way men's union has negotiated agreements with a number of roads and has secured advances for its members.

A joint submission of wage disputes between the railroad clerks' union and the Boston and Maine and the Southern Pacific system were filed at the labor board today.

## 25 HURT WHEN TROLLEY OVERTURNS AND BURNS

Teddy, June 8.—More than 25 persons were injured, a number of whom were seriously, early tonight when a street car overturned at Ashland and Broadway avenues and caught fire.

The car, a special run to accommodate employees of the Willis-Coverland company, was crowded to capacity. The accident, company employees said, was caused by spreading rails.

# PEACE ABROAD AND AT HOME OUR MISSION

Religious Welfare Workers' Conference Called by Secretary Weeks United on Duty of United States

## WE MUST BE ARMED

To Work 'Unarmed and Undefended' Would Be Quickest Way to Invite War; Army and Navy Essential

Washington, June 8.—A series of pronouncements adopted by the conference of religious welfare workers called by Secretary Weeks was submitted to him today on the conclusion of the meeting. The religious welfare workers, who included representatives of Protestant, Roman Catholic and Jewish denominations, joined unanimously in the assertion that peace at home and abroad was the mission to which America was dedicated, and added:

"To persevere in unarmed and undefended would be the quickest way to invite war."

The committee which prepared the findings of the conference was headed by Bishop William S. McAdams, of Washington, D. C. (Methodist), and included John M. Thomas, president of the National Council of Congregational Churches; Rev. James D. Wolf Perry, Jr., Rhode Island (Episcopal); Rev. John J. Burke, General Secretary, National Catholic Welfare Council; Rev. Samuel Z. Batten, secretary, department of social education, American Baptist Publication Society; Colonel W. P. Jenkins, Salvation Army and Rev. Jason N. Pierce, First Congregational church, Washington, D. C.

In all more than 60 clergymen, educators and leaders of welfare organizations, attended the three-day conference. The sessions were presided over by Dr. Cyrus Adler, president of the Jewish Welfare board, Bloomsbury, London, and Father Francis Duffy of New York.

In declaring the attitude of the conference and the churches and organizations it represented on the question of national preparedness, the conference pronounced:

"Peace at home within our own country, peace among all the nations of the earth is a sacred mission to which America has devoted herself and her resources. To pursue it unarmed and undefended would be the quickest way to invite war. Against the curse of militarism America has traditionally set herself. Militarism is absolutely strange to the genius of her institutions. Her army, in time of war, is a citizen army; her navy, in time of peace, is a volunteer army. Citizens direct her army and navy; the existence and upkeep of both are contingent upon the will of a representative congress."

"The army and navy of the United States have always been essential to the life and welfare of the republic. The army and navy of the United States, command, therefore, the respect of every true citizen."

At another point the pronouncement said:

"We deprecate any attempt, made under the cloak of religion and in the name of a false piety, to deny the support of the churches to the well being of our army and navy."

## GUARD ADVISES LASKER TO "THINK UP NEW EXCUSE"

Boston, June 8.—The title of chairman of the United States shipping board, which was held by Mr. Lasker, was today being defended without evidence, mainly because an Italian priest told the board that he had money in the bank and was about to go to Europe.

He made good his promise and many others followed his example.

## LITTLE LESSONS IN Big Sports

How and when is a spoon used?  
 Answered by LAURIE AYTON

Always a consistent place winner in the big tournaments—National Open, Metropolitan Open, Western Open and sectional tournaments. Famed for his accuracy and steadiness under fire.

The spoon should be used when a ball is lying cupped, or when a long shot must be made toward a hole where the ball must come to a quick stop after hitting the ground. The spoon puts a back-spin on the ball that causes it to roll very little. With the average golfer, a spoon shot is good for 150 to 200 yards. The spoon is used with the same full swing which a player employs with a driver or brassie. I use a fairly open stance because it gets the ball into the air easier and with more certainty.

## MAY BE DEEPEST RIVER IN WORLD

Scientific Survey Asked for Natural Phenomena on Upper Ottawa River in Canada.

Toronto.—The Canadian government has been asked to make a special survey which it is expected will prove by scientific measures that Canada is the possessor of the deepest river in the world.  
 Hidden beneath the amber waters of the Upper Ottawa river is one of nature's most curious phenomena, rivaling in its way the Grand Canyon of Colorado, the Natural Bridge of Virginia, the Falls of Niagara or Zambesi. It is a gigantic chasm cleft in the surface of the earth in a period which must have approached the earliest in the earth's history, for the bed reveals sandstone of the Palaeozoic age.  
 If the Ottawa river were to dry up, the chasm with its walls 6,000 or 7,000 feet high would eclipse the wonder of Colorado. As it is, the Deep River reach of the Ottawa claims the distinction, which it is hoped will soon be scientifically confirmed, of being the deepest river in the world.

**5,000 Feet and "No Bottom."**  
 In several places over a distance of 23 miles, 5,000 feet of tow boat lines have failed to give an anchorage.  
 By comparison the Great Lakes are but duck ponds and the famous fjords of Norway and the East Atlantic coast are quite eclipsed. Lake Erie has a depth of only 272 feet. Lake Ontario is not much better with 265 feet. Lake Michigan has 780 feet. Lake Superior, the deepest of all the great inland seas, is only 1,307 feet, or about one-fifth as deep as the Deep River reach which probably proves to be. One of the East Atlantic fjords shows 3,000 feet, and the Sogne fjord of Scandinavia is 4,000 feet.  
 Deep River reach of the Ottawa is north of Pembroke and is traversed by serviceable steamers. The southern stretch of it is found identified on most maps as Upper Algonette lake. This part of the river course is dotted with hundreds of beautiful islands furnishing summer homes for urban residents.

**On Civilization's Edge.**  
 They are at this point of the northwest edge of civilization. Toward the North Star and Hudson bay lies only wilderness broken only at one midway point by the National Transcontinental railway, which with its still rustling rails will one day give Canada depth as well as breadth. To the southwest lie the Plains of Petawawa, famous as a military training ground, particularly for artillery during the war.  
 Farther on you enter Osego lake (locally called "Weesee"), surrounded by a series of the most picturesque mountain peaks to be found anywhere in the whole Laurentian range. Prospect succeeds prospect in a never ending succession of the best of the wilds is like wine in the veins.

A point called Des Jo Achim is the upper limit of the Great Chasm. Here the river makes a right angled turn, and is transformed from a madly surging rapids to the restful, slow moving deep current of the Grand Chasm.

## Radio SOS and Daring Skipper Saves Man's Life

Cape May, N. J.—John H. Steel owes his life to the miracle of the radio and the courage of two hardy skippers who risked their lives, with those of their crews, to save him.

Steel, a member of the crew of the Fenwick Island lightship, anchored 30 miles southeast of this city, was attacked with appendicitis the other night. The skipper broadcast a radio appeal, which was picked up here. He rushed it to Capt. R. C. Weightman of the coast guard cutter Kickapoo.

Despite a raging sea and vicious wind, Captain Weightman put to sea, and he and eight others were alongside the Fenwick. The latter's crew put a boat over with Steel in it, and after a hard fight transferred the sick man to the Kickapoo, whence he was hurried to the government hospital at Lewes.

### FROM DELAWARE'S CAPITAL

#### Funeral of Wallace Crosby to be Held Saturday—Uncle's Residence's Father.

Delhi, June 8.—The funeral of Wallace Crosby will be held today at 2 p. m. from St. John's Episcopal church, conducted by the rector, Rev. D. H. Morse. Interment at Delhi. Mr. Crosby was born near Margaretsville 25 years ago. He was a soldier in the United States army during the Civil war, was a bookkeeper and had worked at his trade in Delhi until ill health prevented. He is survived by one son, Raymond Crosby of Otego, and two daughters, Mrs. Wilson Hooper of Otego, and Miss Anna Crosby of Delhi.

#### Hold Spelling Matches.

A spelling match for school children of the town of Delhi was held here Wednesday by School Supervisor E. H. Harkness. Yesterday Mr. Harkness held a contest for Hamden township and today for Walton. The three towns mentioned comprising his district. Baby Williams won first and Marie Hansen second for Delhi. Tomorrow, Saturday, the winners in the three towns will compete at Hamden for the district championship. The winners for the district will take part in the Delaware county match to be held in Delhi June 16.

#### Mozart-Apollo Club Concert.

The tickets were all sold out for the Mozart-Apollo club concert held in the opera house last evening and an enthusiastic audience that filled the house listened to one of the finest musical programs ever heard here. The receipts of the evening were about \$200.

#### Real Estate Transfers.

Recent village real estate sales include William Johnson's residence on Jackson terrace to Lauren Mason; possession July 1. Lauren Mason's residence on Clinton street, formerly the Beckwith home, to John Blakely, a retired West Kortright farmer, who

will occupy it, and the Clarence J. home, Delaware avenue, now unoccupied, to John Blakely, whose plans regarding the property are uncertain as yet. Mr. Johnson and Blakely will move to the former Judge Wagner house, Delaware avenue, which he has rented.

#### Rhodes Wrenches Ankle.

Judge Leon C. Rhodes of Washington, who is holding the term of supreme court here, wrenched one of his ankles quite badly while hurrying down Main street Wednesday morning and has since been walking with a very noticeable limp.

#### Miss Kittredge Graduates.

Miss Florence S. Kittredge, daughter of Rev. and Mrs. W. M. Kittredge, formerly of Delhi, graduated Friday, from the Spaulding High school at Barre, Vt., among a class of one hundred. Miss Kittredge plans for college next year.

#### Home for the Summer.

Miss Marian Dodds and friend, Mrs. Dorothy Yarnall of Little Rock, Ark., arrived last evening at Miss Dodds' home, the former for the summer and the latter for a ten-day visit. Miss Dodds has been studying in Columbia University, New York, the past year. She will resume teaching the coming year, going to Albany.

#### DAY BY DAY IN DAVENPORT

##### Epworth League Meets Monday—Officers Elected for Ensuing Term.

Davenport, June 8.—At the semi-annual meeting of the Epworth league held last Monday evening, officers for the ensuing term were elected as follows: President, Mrs. E. A. Jaber; 1st vice president, Mrs. E. J. Jaber; 2nd vice president, Miss Lucy Shellman; 3rd vice president, Mrs. Arthur Brockway; 4th vice president, Carlton Roberts; secretary, Vera Golden; treasurer, Marjorie Hall; organist, Dorothy Boyer; assistant, Vera Golden.

##### Returns to Kortright.

Alexander Johnson, formerly of Gunn Hill, town of Kortright, but who the past few years has resided in Davenport, Davenport Center, Canada, Kirkwood and for the past few months at Oxford, has sold his farm in the latter place and has moved back to his former home. Mr. Johnson sold his farm in Oxford a few years ago, but the sale has not been satisfactory and he takes the property back.

##### That Mixed Relationship.

In Tuesday's Star, in the announcement of the marriage of Edward Stephen Clark to Mrs. Helen VanLoon, it should have stated that Mr. Clark was the father of Mrs. Warner, not

Mr. Warner; and Mrs. VanLoon, the bride and mother of three children, was a sister of Mr. Warner. Figure out the relationship by this union. The correction is made by request of interested parties.

#### Masonic Minstrels Next Thursday.

The Masonic Minstrel company of Franklin will put their play on here at the opera house Thursday evening, June 14th. This company recently put their show on at Franklin and played to a \$200 house. Practically speaking they are the same people that played "Devon Dubs" here a few years ago and made such a hit. Mrs. Florence Jackson and F. W. Page have charge of the musical part which insures to our people a great musical treat. They come under the auspices of Charlotte Valley Rehearsal lodge 352.

The collection which will be taken, will go as usual to the students' loan fund. Sunday school will be held at noon, and all children taking part in the program are especially urged to be present. There will be morning worship so that all who wish may attend the service at the Presbyterian church. The Children's Day exercises of the Presbyterian church will be held at 10:30 o'clock and a most interesting program has been arranged.

### King Tack Done for Taxes.

In old English towns during the Seventeenth century if the owner of a building failed to pay the taxes due the king the doors and windows of the building were taken off, every one in the town was told to look at the structure and to remain idle for a year and a day or longer before the doors might be redeemed in open court or before the building could pass to the next heir.

### Early Horseback Riding.

The early Greeks and Romans rode horses back. They regarded it as unmanly to ride in a saddle. In fact, the modern saddle with pommel and stirrups was unknown to the ancients. Now gave out fancy saddles to the cavalry and the horse and riders of the German forests used to laugh at them. Saddles with trees came into use in the Fourth century, and during the centuries later.

—Mrs. A. L. O'Connor has received word of the serious illness of her brother-in-law, Fred Bishop, at Margaretsville. — Mrs. Wayne Peters spent Friday in Halcottville.

#### DOUGLAS I. CAMERON.

##### Funeral of Prominent Bloomville Man to be Held Saturday Afternoon.

Bloomville, June 8.—Douglas I. Cameron, who died yesterday following a week's illness from pneumonia and grip poisoning, was born on January 12, 1852. In 1903 he was united in marriage to Nettie Kinch of Peapack. Mr. Cameron came to Bloomville 17 years ago, having at that time the James Smith farm, which he sold in 1918 to F. W. Crowe, moving then into the village. In 1919 he purchased the J. S. Brown farm a half mile from here, where he resided at the time of his death.

Surviving are his wife, three children, Margaret, Evelyn and Howard; his father, Daniel Cameron, and his stepmother, of Delhi; two brothers, John and David Cameron of Peapack, California; a sister, Mrs. Thomas Arnsperg, of Delhi; three half-brothers, Alexander and Arthur Cameron, of Delhi, and Leslie Cameron, of Watson, and a half-sister, Mrs. Roland Thompson, of Delhi.

Mr. Cameron was prominent in village affairs, being a member of the board of the Union Free school and vice president of the Bloomville Telephone company. He was a member of the O. O. F. and Rehearsal lodges and the Grange in Bloomville, and of the Masonic order and the I. O. O. F. organization in Delhi.

There will be a prayer at his late home at 1 o'clock on Saturday, and services at the Methodist Episcopal church at 1:30. Burial in Woodlawn cemetery, Delhi. The services will be in charge of the fraternal orders of which he was a member.

#### Social and Exercises Postponed.

The Grange social which was to have been held this evening and the children's day exercises to have been held Sunday at the Methodist church have been postponed because of the death of Douglas I. Cameron. The social will be held June 15 and the children's day exercises at the morning service on Sunday, June 24.

#### Personal Mention.

Mr. and Mrs. Leslie Williamson were Port Huron visitors yesterday. Mr. Williamson's father and mother, Mr. and Mrs. James Williamson of that place, returned with them for a few days' visit.

## MRS. COFFMAN ILL SEVEN YEARS

Saved from an Operation by Lydia E. Pinkham's Vegetable Compound

Sidell, Ill.—"I was a nervous wreck. I was suffering from a pain in my left side, which was almost unbearable, and I could not even let the bed clothing rest on my body at night. I had been ill for seven years, but not so bad until the last eighteen months, and had been told by the doctors that I was all there was left. I would not consent to that, so my husband bought me a bottle of Lydia E. Pinkham's Vegetable Compound and begged me to take it. I have taken fourteen bottles of it and I feel ten years younger. Life is full of hope. I do all my housework and had a large garden this year. I never will be without the Vegetable Compound in the house, and when my two little girls reach womanhood I intend to let them take it. I am never too busy to tell some suffering sister of my help, and you can use my name and letter to spread the good news of Lydia E. Pinkham's medicine."—Mrs. I. A. M. COFFMAN, R. B. 2, Sidell, Ill.

How Birds Keep Down Insects. All through the winter months our forests are searched, tree after tree, by nuthatches, titmouses, creepers and woodpeckers for eggs and other hibernating forms of insects, says the American Forestry Magazine. Under normal conditions they destroy something like 20 per cent of the tiny caterpillars hatching upon the external parts of trees.

Party Control. Whatever party is in control of a legislative body exercises that power. Effective party organization demands that the majority party have a majority on every legislative committee, for as a rule the destiny of legislative bills rests in the hands of the committee to which they are referred.

## LOCAL MENTION

The Sunday school picnic of the St. James' church to have been held today has been postponed.

Patrons of the Huntington memorial library are reminded that the library closes at 8 o'clock evenings.

Because of repairs which are being made at the First Methodist Episcopal church there will be no service at 11 o'clock tomorrow.

Announcement is made that J. N. Howler from the Brooklyn Bethel, representing the International Bible Students' association, will be in Oneonta June 13 and 14, and that on the latter date he will speak in the Universalist church at 8 p. m. His theme will be, "Better Times Coming."

Mayor C. C. Miller and City Attorney George L. Gibbs leave today by motor for Buffalo, where they will attend the sessions next week of the Conference of Mayors and Other City Officials. They will spend Sunday in Rochester, proceeding to their destination Monday morning. Aldermen H. C. Lawrence and C. H. Morris and City Clerk E. L. Sellers also expect to attend the conference.

## Meetings Today.

Rehearsal at 7:30 this afternoon for children's day at the United Presbyterian church on First street. All those taking part in the children's day program at the First Presbyterian church are requested to be at the church Saturday evening at 7 o'clock for rehearsal.

## Meetings Sunday.

As June 10 has been set aside by the grand lodge as a Memorial day for departed brothers, all members of D. Hopkins lodge will observe the same by meeting at lodge rooms at 7 p. m. on the above date, for the purpose of attending the service at Chapin Memorial church, M. E. Roarick, secretary.

Regular meeting of Seneca County lodge, No. 71, B. of L. P. and E. 2:30 p. m., Sunday, in K. of P. hall.

**Biederman Receives First Strike.**  
 Karl Biederman, son of Dr. and Mrs. C. L. Biederman, on Thursday received his first strike at the United States Naval academy. His scholarship record at the institution has been most gratifying and for the year was 3.57, which is a marking on a basis of 4.

This morning he will leave for an eight day cruise on the flagship Arkansas. The first landing will be made at Copenhagen, and after spending some time in the various countries of Europe, those on the cruise will return to native waters for the maneuvers of the fleet.

About the first of September Midshipman Biederman will arrive in the city to spend his month's leave with his parents.

## "What Fools We Mortals Be."

And it's a darn true old saying. If a person could advertise to sell 100 pounds of sugar for \$2.50 there would be a mob at his door next morning, crowding and clawing to get it, while for long years I've been giving them a chance to quietly lay away 35 cents each day, place with me monthly and have \$2,000.00 handed to each of them at end of each 129 months. Well, if they won't see a hole in a ladder, we'll have to pass the hat and also continue to pay larger taxes to care for them later. Some people won't be helped nor help themselves, even when they see me safely rolling small amounts up to over five million dollars. What a queer old world. When the chumps see others, with no better wages or advantages, get their \$2,000.00 each, how the chumps get white and eels about not having had a fair chance. Hark! Don't we need a fool catcher as well as a dog catcher? I'm the safe and sane Oneonta Building and Loan association. advt 11

## CHILDREN'S DAY PROGRAMS

Exercises to be Presented in Many of the City Churches—Notes of the Day in Other Churches.

Children's day is to be observed Sunday with special programs by the children of the First Presbyterian, Main Street Baptist, Chapin Memorial Universalist and River Street Baptist churches. The program in the First Baptist church has been postponed a week because of the death of Mrs. A. E. Nye, and in the First Methodist Episcopal church because of repairs to that edifice.

The exercises in the Lutheran, Elm Park and United Presbyterian churches had been planned for June 17, and programs for these, as well as those which have been postponed, will be carried in a later issue of The Star.

## POWER CONTROL BOARD

Interesting Device in Office of Local Light and Power Company Illustrates Exact Situation at All Its Power Plants.—Illustration Accompanying.

Supervision of the power plants at Oneonta, Colliers, Hartwick, Sidney and Norwich and the hundreds of miles of wire connecting them would be a difficult job for A. P. Broadhead, in charge of the high tension line for the New York State Gas and Electric corporation, were it not for a huge control board which hangs in front of his desk in the Oneonta office. This board represents graphically the entire power system of the company under his supervision with switches indicating the position of the various plants. Mr. Broadhead is in constant touch with the plants and these switches are opened and closed indicating whether the power units are operated or allowed to remain idle.

By glancing at the board Mr. Broadhead can tell how the power load is distributed at any given moment. If the plant at Oneonta should break down he can tell immediately what units are idle along the system and what plants can best spare power to be sent over the high tension line to keep the Oneonta service uninterrupted.

If trouble should happen along the line he can locate it approximately and knows where to send his repair men.

In this connection it is interesting to note how the company protects its line men on the high tension line. If a break should occur between Oneonta and Sidney, for instance, the power would be shut off between the two places and line men sent to the place where it was thought the trouble lay. There would also be the possibility of the power being switched on by accident, so each workman is supplied with a rope of woven copper with a pin on one end and a weight on the other. He slips the pin over the ground on one side of the wire and throws the weighted rope over the wire. A ground is thus established which would blow out a fuse and stop inflow of power if it should be switched on accidentally.

The board shows that the company operates two frequencies, 25 and 60 cycles, the former for the trolley and the latter for city service, and six voltages, increasing from 250 to 44,000, the latter voltage carried on the high tension line.

**Buckley Brothers Company Elects.**  
 The annual meeting of stockholders of the Buckley Brothers company of Oneonta and New York was held yesterday morning at the company offices in this city, the directors elected being: H. H. Buckley, George E. Northrop, L. C. Dole, L. W. Kenfrew and J. F. Buckley.

At the meeting of directors Mr. Buckley was re-elected president, Messrs. Dole and Kenfrew, vice presidents; Mr. Northrop, treasurer and Mrs. J. F. Buckley, secretary.

Mr. Rathbun, who came with Mr. Dole from New York for the meeting, will remain for a few days, calling on old friends in Oneonta and not improbably in Mt. Vision.

**Visitation to Martha Chapter.**  
 Last evening Right Worthy District Deputy Grand Master Hattie M. Rickard and Right Worthy Assistant Grand Lecturer Ely W. Goldsmith of the Oneonta-Schenectady district of the Order of the Eastern Star paid their official visit to the Martha chapter, No. 116, of this city. Following an excellent banquet which 150 attended, the visitors were heard with much benefit.

**Mattie Benefit Fund.**  
 Mrs. L. C. Webb of this city sends \$1.00 for the Mattie Benefit fund, which brings the total received at the Star office to \$2,178.75, the last published report of receipts showing \$2,177.75.

The fund will be forwarded to Mrs. Mattie as soon as the matter is approved by Superintendent Chandler of the state consular.

**Rev. L. C. Denney Recovers Sprains.**  
 Rev. L. C. Denney of St. James' church had the misfortune to slip on the steps of the residence of W. W. Capron last evening and receive a sprained ankle and wrist. He was taken to the residence of L. D. Van Woert and spent the night there, and was reported to be as comfortable as could be expected. The injuries are painful but it is hoped will cause no inconvenience after a few days.

 At the African Methodist Episcopal church on High street the children's day exercises will be held at the usual Sunday school service hour in the afternoon. There will be singing and recitations and all who are interested are invited to attend.

## GETS FIVE TO FIFTEEN YEARS

Judge Welch Sentences Men to Auburn State Prison—Court Adjourns at Noon.

The case of the people vs. David H. Mead of Oneonta, an action which had been on trial for four days at Cooperstown and in which the jury after several hours deliberation brought in a verdict of guilty of attempted kidnapping on Thursday evening, reached its conclusion yesterday morning, when at about 11 o'clock the prisoner was brought before Judge U. G. Welch for sentence. The court after a few remarks in which good advice was given to Mead, along with the hope that he will return from prison a better man, imposed a sentence of at least five years and not more than fifteen years in the Auburn State prison. From the expressions heard about the court house by those who had opportunity to attend the trial, the verdict is believed to have been fully justified by the evidence, and the sentence not unduly severe.

So far as is known there will be no effect made for a new trial. After the jury came in on Thursday night, Attorney C. G. Tennant, made the usual formal motion to have the verdict set aside as against the weight of evidence. This was denied and to this time at least no further action had been taken. Mead will at once be taken to Auburn to begin his sentence.

Taking of evidence in the contested George VanSlyke will case began at about 9 o'clock Friday morning. But little time was occupied in the swearing of witnesses, and before noon the attorneys, who were Hon. N. F. Willis for the executor of the will and Hon. G. L. Dockes of Oneonta for the contestant, had finished their pleas, the jury had retired and had returned with a verdict sustaining the will.

There being no other cases to be heard at this term, the court was duly adjourned.

**Progress of Paving Construction.**  
 The steam shovel belonging to the William F. McDonald Construction company was moved yesterday morning from the foundry at East End, where it was assembled, to Walnut street, where it was used later in the day to fill the sewer trench. The work of placing the storm water sewers on Church street is progressing satisfactorily and should be finished by the end of next week. The granite curbing has arrived and work will probably be started today laying it on Church street.

**Prizes to Poppy Sellers.**  
 At the Boy Scout meeting held on Thursday evening prizes were presented to the Scouts selling the largest and second largest number of American legion poppies. First prize of \$1 went to Scout Stratton who sold 118, and second of \$7.50 to Scout Edwards who sold 86.

## TEXAS MAN BREEDS QUEEN BEES FOR EVERY MARKET

By Use of Artificial Means He Fools the Bees and Reaps Income of \$50,000 a Year.

Raising and selling queen bees bring to E. B. Ault an annual revenue of more than \$50,000, and most of this is profit. Mr. Ault's queen bee farm is near Calallen, Tex., and is in its twelfth year of successful operation. He ships the queen bees all over the United States and to foreign lands, including Australia, Japan and countries of Europe and South America. He also ships many colonies of working bees.

Breeding queen bees is done partly by artificial means. There would be no money in the industry if the natural breeding method of the bees were depended on for queens. It is explained. It was discovered that the working bees, like carpenters, performed their work according to the plans and specifications of the architect; so Mr. Ault began building large cells for queens in the artificial wax comb foundation. These queen cells are then filled and produce queens, according to the foundation specifications.

As a result of this artificial method Mr. Ault obtains about 100 queens from every hive of 2,000 to 3,000 working bees, instead of only one queen. The bees are fooled, but they do not seem to mind it.

Queen bees vary in price. When the demand is slow they sell for as low as \$1, but ordinarily they bring \$2.50 to \$3.75 each. Just now there is an extraordinarily good demand for them and the price is on the upward trend.

**Speed of Hare.**  
The rabbit runs faster than a hare for the first 85 yards. A motor car at 40 miles an hour will overtake and pass a hare, but up to that speed the animal will usually hold his own.

**One Thing That Can Be Helped.**  
You cannot help the kind of brains you are born with, but you can help the kind you go through life with. And that's what counts.—E. C. Forbier.

The right make, the right grade and the right weight

THE grade of Carey roofing you should have depends on the type and size of building. The kind of building and the length of service you want to get also governs the weight of roofing you should have. Our long practical experience in this community as roofers is at your service. If you will tell us the kind and size of your building and how long you want the roof to last we will be glad to recommend the right grade and weight for your purpose. A roof that is no better or more expensive than it needs to be, but is just as good as you should have and as inexpensive as you can get to fully answer your purpose—that is what we mean by the right roof for your building.

## WOMAN BREEDS QUEEN BEES FOR EVERY MARKET

Ready to Receive Proposal After All-Night Dance.

Washington.—The modern "society" supper, with her coming-out party, has nothing on the American Indian maiden, whose marriage-announcement party has been among the tribal customs from time immemorial.

Among the Washoe Indians of Nevada there is a dance or ceremony known as "the girl's dance," in honor of the young girl who becomes eligible for marriage. Her white cousin, however, would hardly care to be the star of such a feast, for the guest of honor is allowed to eat nothing at all for four days previous.

On the fourth night the dance starts at about eight o'clock, and sometimes lasts until sunrise the following morning. The Indians form a circle, joining hands, and move by short side steps in a ring, humming a sort of chant without words or meaning.

The girl, accompanied by an elder woman as a sort of chaperon, and carrying a long staff to support her because of the weakness induced by her long fast, weaves in and out of the dance, joining in the step.

As the dance proceeds late into the night, the girl's family give money and other possessions to the dancers to keep them moving and to induce others to join in. The greater the number of dancers the greater the popularity of the family. Shortly after midnight a feast is given by the girl's relatives, and all participate.

The ceremony closes at sunrise when

## Turns Clock to Make Wife Late in Court

Valentine Engesser, twenty-four years old, of Brooklyn, N. Y., was held for trial when arraigned before Magistrate O'Neill on charge of assault preferred by his wife, Helen. The case was set for ten o'clock, and Helen showed up at eleven. Just as the magistrate was about to send an officer to find out why she did not appear, she entered the room.

"Where were you?" asked Magistrate O'Neill.

"I was out of the house," replied "my husband set the clock back two hours so as to make me late."

the girl is taken to her tepee and attended in bunches of sagebrush in which money is concealed. She appears before the assembled dancers outside and throws the money to them amid a wild scramble. A can of water is then dashed over her head as the concluding ceremony, after which she is ready to receive a proposal of marriage.

## Game Warden Kills 118 Rattlesnakes in Den

Yakima, Wash.—W. B. Gunnoe, deputy game warden, accompanied by his son, recently killed 118 rattlesnakes in a den on Cowiobe creek, about twenty miles from here. The killings were accomplished with 22-caliber rifles until the ammunition gave out, when the job was finished with clubs. The snakes ranged in size up to four feet in length.

## MISS SMALL; WEDDING HALTS

Groom Insists on Full Ceremony, So Change Is Made.

There was an unusual interruption to a wedding ceremony in a north London register office when the bridegroom put the ring on his bride's finger and found it would not go beyond the knuckle. He made several attempts to get the ring on, but without success.

Saying that the jeweler must have mistaken the size, the bridegroom asked the registrar if he could wait till he got it changed. The official said that the ring did not matter, as they had both said the contracting words and were legally married. All that remained was to sign the register.

"Oh, but we must be married properly," replied the bridegroom. "I want my wife to have her ring now and in your presence." The bride agreed, so leaving her in the office, he hurried to the jeweler's and returned with a larger ring.

## Praises Ukulele Thief.

"I have a notion to give you the addresses of all the ukulele players in the city. You are almost a public benefactor." Thus spoke Judge Talley of New York city when Dennis Murphy was arraigned for stealing five ukuleles from a freight car. Murphy was paroled.

## Blames Court for Crime.

Declaring that he thought the courts would not punish him, Leslie Spraley was arrested at New York city for stealing \$1,300 from his employer. The youth said a Chicago judge recently decided that messengers were not wholly to blame for stealing from their employers.

### French War Minister Sets Army Molar Limit

Paris.—Minister of War Maginot has ordered that any candidate for the colonial army "must have a sufficient number of good teeth."

The decree says that by sufficient and good teeth is meant six pairs of teeth directly opposite one another on the upper and lower gums, of which two pairs must be molars or premolars, and two pairs front or canine teeth.

Many of the men who went to fight in Algeria and Morocco were found to have defective teeth.

The Senegalese battalions show splendid rows of shining ivory. "I'll back them against the best eaters any army had ever produced," a colored official officer said the other day.

Then he added, with a touch of dry humor: "You see, we come from a long lineage of cannibals."

### French War Minister Foiled in Britain

London, England.—What happens to the people in Great Britain who do not pay their income tax has been told by an official of the inland revenue, who declares there are about 1,000 such delinquents now in jail, compared with 1,162 two years ago.

Plenty of time is given by the authorities for payment, said this official, and in cases where it can be shown that funds are not available easy methods are devised. In other cases, after a certain interval, a notice is sent to the defaulter that the tax must be remitted by a certain date—usually ten days' time. If that is disregarded a more urgent notice is sent and three days' grace given. After that a distress warrant against the defaulter's goods is obtained. Those who are imprisoned for default are generally single or have no salable property of their own.

Being asked by his teacher if he could name some commercial appliances used in ancient times, a young man replied: "Yes, sir, the loose-leaf system used in the Garden of Eden."—Boston Evening Transcript.

### You Tell 'Em

"Are all flowers popular?" asked the teacher. "No, ma'am," replied one of the bright little girls. "What flowers are not popular?" "Well, flowers, ma'am."—Teachers' Statement.

### Thorbred Cords

#### Built for Underinflation

Guaranteed for 10,000 Miles

**LOWER** air pressure means softer, more resilient, more pliable riding cushion for your car. It stops the bumping, jarring and jolting over the holes and ruts in the road. It saves the car and provides greater riding comfort. But the Dayton Thorbred Cord is the only tire that can be used with reduced air pressure—the only tire planned, designed and built to give maximum service underinflation. Still guaranteed for 10,000 miles, still priced remarkably low.

Equip your car with a set of these tires and for the first time enjoy the comfort and economy which only Dayton Thorbred Cords give.

Here is the testimony of a motorist who has tried many kinds of tires: "Dayton Thorbred really carries anything built of rubber and fabric. We don't think that 25,000 miles is uncommon performance for Dayton."—The Hicks Rubber Company, Waco, Texas.

### STUDY ANCIENT CHINESE CULTURE

#### Fogg Museum of Harvard is Sending Trio of Scientists on Exploring Expedition.

Cambridge, Mass.—The Fogg Art Museum of Harvard is sending three men to China for exploration and research. The force will consist of Langdon Warner, '28, who, until recently, was director of the Pennsylvania Museum; H. H. F. J. J. J., '28, assistant curator of that institution, and Duncan McDougall, son of Dr. William McDougall, professor of psychology at Harvard.

The work will consist largely of a preliminary survey in central and western China and will probably last not more than eight months in the field. Mr. Warner, who is in charge of the expedition, hopes to make considerable progress in determining the true sites of the Sung dynasty and to visit some of the rock grottoes containing Buddhist sculptures of the Fifth and Sixth centuries A. D. A comprehensive series of rubbings from inscribed and decorated stone monuments and a considerable number of photographs, which have not been hitherto obtainable, are expected to be secured for the Fogg museum. It is hoped also that two or three important examples of early architecture still existing in northern China and Manchuria, which are fast falling to ruin, will be thoroughly measured and photographed.

To Collect Photographs.

As funds are not available for the purchase of original objects of art to enrich the collections at Harvard, the first year's expedition will confine its work largely to securing photographs, rubbings, measurements and other materials for the study of early and medieval Chinese culture. If the results of the preliminary trip warrant it, explorations will be undertaken next year, if the consent of the Chinese government is obtained.

The importance of such work is apparent, the Fogg museum authorities declare, when it is realized that, although Europe and America are familiar with the contents of early Chinese tombs, for which fabulous sums are paid by collectors and museums, no tomb with its contents undisturbed has been recorded and photographed by a responsible scientist. The tall pottery canals, providing horses, jars and bronzes and jade found disposed about the bodies of the dead have been brought over by thousands, but the priceless information by which they might have been exactly dated is not available. It is argued that to know the arrangement of these little processions of figures in the grave, to find what wares are associated with others, to measure these tombs and to find and copy "in situ" the objects buried with the dead would be worth more than the actual possession of all this material.

Study Buddhist Art.

Until the Harvard party reaches China nothing can be definitely foretold of the extent of its travels. Political disturbances may interfere seriously with much that should be accomplished, and the government at Peking is able to furnish the Fogg museum with no definite assurance that its representatives will be able to carry on their proposed investigations. It is believed to be certain, however, that enough opportunities will be found to repay the first year's work and to pave the way for a return trip.

The Harvard party will devote its time entirely to the study of Buddhist art, and its labors will not conflict with those of other expeditions that may be in the country.

### Blind Man Sponsors City Beautiful Plans

Topeka, Kans.—The first campaign inaugurated by A. R. Van Patten, the newly-elected president of the Chamber of Commerce here, who is totally blind, was one for the beautification of this city.

Despite the fact that Mr. Van Patten is destined never to look upon the beauties of nature his campaign may bring out, he declares he appreciates his new honor as president of the local civic body mainly because it gives him the opportunity to sponsor a movement that has always been close to his heart.

A systematic organization to carry out the project was perfected by Mr. Van Patten and includes ward and precinct committees, headed in each instance by someone vitally interested in the campaign, and also school children.

Each school child has been presented with a red tag bearing the pledge: "I won't pick flowers or break off branches."

"I won't cut across lawns because it kills the grass."

"I want Topeka to be more beautiful."

Mr. Van Patten has been blind for 14 years.

Synthetic Camphor is Cheap.

New York.—Adolph Ketchum, a chemist of this city, who has just returned from Germany, brought samples of synthetic camphor recently perfected by German chemists, which, he said, can be produced in quantities of a fraction of the cost of the genuine camphor, and is equally valuable for medicinal and industrial purposes, including the manufacture of celluloid.

Village Spreads for Cities.

Probably the largest village in the world is Kempen, England, which stretches along a single road for seven miles.

### Count "Restored" Dead Man as Administrator

New York.—What is believed to be a record in the law's delay came to light when Surrogate O'Brien handed down a decision on a motion made twenty-nine years ago. The man who would have been benefited by the decision has long since died.

Restored to the estate of Emma T. Rawson recently sought to call some property belonging to her estate, and discovered that litigation started in the surrogate's court after her husband, Albert T. Rawson, had been appointed executor and trustee in 1895, was still pending and the title to the property could not be cleared.

In 1895 Rawson was removed as administrator. He died while the suit to restore him was pending. To keep the record clear the court restored the dead man as administrator.

### Why Fly Can Walk on Ceiling

The fly has two sharp claws to each foot, by means of which it gets a firm grip of any rough surface it walks over. Besides these claws, it has on each foot a little velvet pad, always kept moist with a special kind of gum which it makes for the purpose. It is by the help of these sticky pads that it can run up a window-pane or take a walk on a ceiling.

### Real Wisdom is Advice

It was a wise philosopher that invented this saying: "Live as if every moment were your last." If we could heed this advice what a different complexion the world would wear for us. Instantly new values would spring into the mind. The common things of life would take on hues of brilliance.

### Stanza Geography

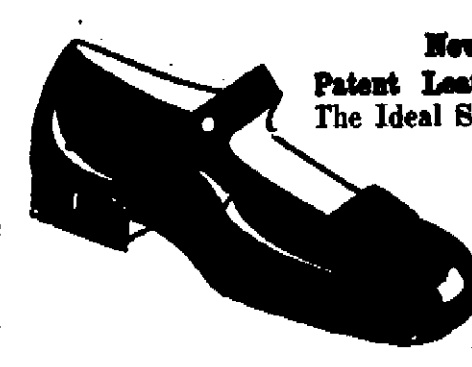

No person, other historical or legendary, has more places named after him than the devil. The famous explorer, Captain Amundsen, added to the list during his expedition. He gave us "Devil's Glacier" and "Devil's Dancing Room."

Here's Papyrus who won the English Derby, many who wagered in mistakes being lured from poverty to affluence by his victory. Stove Donoghue, the jockey shown here, has his victory on Papyrus won the Derby three successive years and five times in all.

## LEPER COLONY HAS 399 CASES

### Victims' Faces Now Beam With Hope on Small Island in the Mid-Pacific.

Kalaupapa, Island of Molokai, T. H.—A spirit of happiness almost inconceivable and a peace that passes the bounds of human understanding walk with tragedy through the isolated, cliff-guarded, surfringed strip of shore that has given this portion of the Hawaiian archipelago the name of "the lonely leper side of Molokai."

A visitor to the colony, forewarned of the horror it holds, finds all of that horror and more that cannot be discussed. But he finds also that the heavy fog of gloom which once enveloped the tragic, narrow stretch between the sea and the towering cliffs has been dissipated by a ray of light arising from the favorable results that have attended the use of the Dean chemotherapy oil specific during the last two years in checking the ravages of the oldest disease in the world. The hope that springs eternal in the human breast is ever present now at Molokai, even in the most advanced cases.

#### 399 Lepers in Colony.

The number of patients here now is 399, composed of 233 males and 166 females. Racially the groups contain: Belgian, 1; Chinese, 14; Filipinos, 12; Germans, 2; Hawaiian, 239; part Hawaiian, 83; Japanese, 10; Portuguese, 27; Porto Rican, 3; Korean, 8. There are 35 non-leperous employees at the colony, ten non-leperous children of leperous parents and 35 other non-leperous residents.

A man of wealth, of power and of influence throughout the territory accompanied the legislators to the island. He made directly for the hospital as soon as he landed from the vessel's small boat. When the main body of the visitors reached the hospital he was sitting beside one of the beds, weeping. The bandaged form upon the bed was his son.

Babies Are Free From Plague. But all is not sorrow at the saddest spot on earth. Some distance from the hospital is a nursery. On the day of the legislators' visit it contained ten unusually healthy looking babies ranging from two weeks to five months in age. They gurgled, smiled and laughed, and shook tiny, chubby fists at the visitors. Although one or both of their parents are afflicted with leprosy, the most searching examination possible has failed to show a trace of the disease in any one of the children, or in scores of others who have been born to patients at the settlement. The children are cared for by the territory.

### Stole 75-Cent Ride; Got Religion; Pays

Chicago.—Some years ago, John E. Marker, Cincinnati, stole a ride on a Pennsylvania train which would have cost him 75 cents had he ridden in the regular way.

From his home in Cincinnati he has sent the 75 cents to the Pennsylvania company, addressing a letter to A. H. Shaw, general passenger agent.

"As I'm living a Christian life and can see that it is a duty to straighten up my back life, I will send you seventy-five cents (75c) to pay for a ride I stole from the Pennsylvania Co. a few years back," Marker wrote.

"The city I got on at was Columbus City and I rode to Fort Wayne on a freight, took passenger back. Was after work and I got it so I took a passenger back."

"I want to say that a real true devoted Christian life is a very wonderful and glorious life. And if one digs down deep in his heart, and get all his sins purged out by God he will be ready for the 'Holy Ghost' and Fire which is the power God gives His people that follow Him in all the light He has. I do hope and trust you will find this experience if you have not got it. It is for you, if you want it. In God I trust you will and may His richest blessing fall on you and your people."

### Florida Motorist Has Fight With Alligator

Moore Haven, Fla.—While driving along the road between his plantation and the Lee Hoe Farms, Mr. Ed. Frierson had an experience that he will not soon forget. A five-foot alligator ran out on the road in front of the car. Mr. Frierson came to a full stop at once as he did not care to have an argument with the gentleman. He could not avoid hitting Mr. Gator, however, which made the king of the swamps full sore, and with a rush he grabbed the front wheel with his powerful jaws and started to shake the car to pieces. Mr. Frierson jumped out of the car and grabbing a large rock, he struck the gator on the head rendering him unconscious and causing him to relinquish hold on the wheel. After this Mr. Frierson did not lose any time getting away from the scene of battle, jumping into his trusty car and making for other parts as fast as it would carry him.

Post Stops Sale of Letters. Berlin.—Gerdhard Hauptmann, Germany's leading poet, obtained a temporary injunction against the sale of letters written by him to Otto Braun in 1920. Hauptmann found the letters being auctioned for their autographs by a Berlin antique dealer.

## Spain Shows Remarkable Growth in Population

Madrid.—According to the latest figures, those for 1923 just made public, Spain's population exceeds 21,000,000, having reached a density of 42.24 per square kilometer, as compared with 30.40 in 1900 and 30.52 in 1909.

The increase in the ten years 1900-1920 has been just under a million and a half inhabitants.

This increase has been chiefly in the cities, of which Madrid has 730,000 inhabitants, Barcelona 710,000. Then comes Valencia with 550,000, Seville with 285,000, and five towns with over 100,000.

In one respect the population compares favorably with those of other countries, for the number of men and women is almost exactly equal.

## Paris to Recognize Royal Charity Worker

Paris.—Princess Murat is often teased by her friends here about an adventure that befell her recently at Nice, where she manages a restaurant for Russian refugees of gentle birth. Opposite the restaurant was another frequented by local workmen, and the proprietor used to admire the princess as she went about her charitable work, having not the slightest idea of her identity.

One day he introduced himself to the princess, saying that he admired her and appreciated women who worked so well as she did and he would like to marry her. The princess laughed, but promised to think the matter over, and took steps to let the restaurateur know the truth.

## Liners and Rainbow Carry Mail to Alaska

Seattle, Wash.—The Alaskan mail service stands alone in the annals of postal deliveries in that it uses virtually every type of transportation. Green liners take the mail to Seward, up-to-date mail cars carry it to Nenana, dog teams and river steamers take it to Iditarod, auto trucks distribute it to out-of-the-way places and foot-fisted relayers assist in hurrying letters to Nome, St. Michael and Golovin. Now airplanes are soon to take their place in the service to coast towns.

Leaving Seattle, mail for interior Alaska is carried to Seward by steamship. At that point it is transferred to the railroad which takes it to Nenana, 200 miles inland. This takes nine days from Seattle. At Nenana the mail is made up for the maling and trading camps.

In spite of improvement, the old obstacles of ice and snow, whirling rapids, glacier-crowned mountains, storms and mosquitoes wage their fight against the mail carriers, who make their deliveries with remarkable regularity.

French Revolutionary Lander. Georges Jacques Danton (1759-1794) was one of the leaders of the French Revolution and a most in organizing and conducting the attack on the Tuileries, and bringing together with Robespierre, Danton to the scaffold. He afterward was condemned by the revolutionary tribunal as an accomplice in a conspiracy for the restoration of the monarchy and was executed.

## Come Today and Bring Your Friends With You

# New York State Gas & Electric Corporation

## After Your Death

what will become of your estate? Who will manage it? We suggest you make a will and appoint the Wilber National Bank executor. There is good reason for so doing. You may appoint a close friend. He may be honest and upright. Yet because of inexperience, he may make a mistake which will be costly to your heirs. The officers in our Trust Department are experienced and thoroughly competent to carry out your wishes as expressed in your will. The fees are fixed by law, the same for your friend as for the bank on estates less than \$100,000. If over, it costs less to appoint the bank. We shall be glad to confer with you.
